Continental Eagle Tower Driers

TOWER DRIERS DESIGNED FOR ANY SEED COTTON DRYING REQUIREMENT

Continental Eagle tower driers have proven capacity, economy, and dependability. Continental Eagle tower driers are built in sturdy steel sections to handle your drying demands. They are completely self-supporting. No overhead support or bracing is required, for quick installation.

The superior engineering of Continental Eagle's tower driers assures you of dependable performance. They are available in several designs to support your drying requirements. Two standard models with 16" (40.64 cm) shelf spacing are: seventy-two inch (1.8288 m) width X six feet (6'x 6') (1.8288 m X 1.8288 m) and seventy-two inch (1.8288 m) width X eleven feet (6'x11') (1.8288 m X 3.3528 m). Many variations of the two basic models can be manufactured for the customers requirements. Some requirements require 12" (30.48 cm) or 10" (25.4 cm) shelf spacing or shelf spacing to support your drying requirements, 16", 20" and 25". These Continental Eagle tower driers can be designed to handle any high capacity gin plant, including the new 60 bale-an-hour super gins.

Continental Eagle Tower Driers

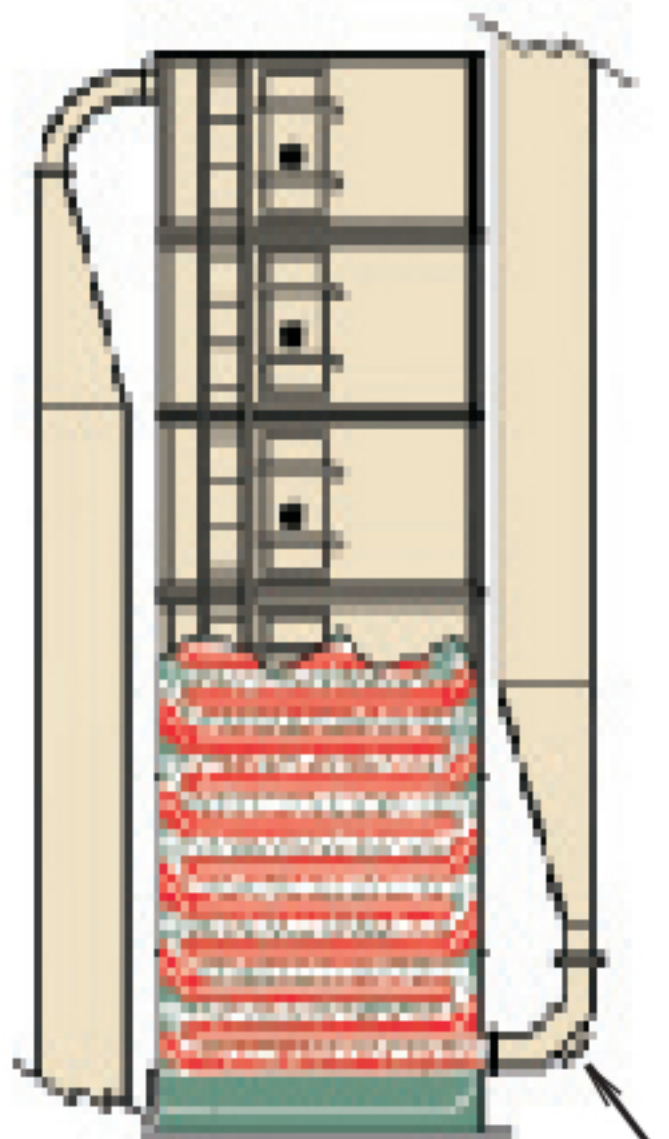

ELEVEN TO TWENTY- FOUR SHELVES

Continental Eagle's unique section design lets you choose any number of shelves, from eleven to twenty-four. Standard alternate outlet openings permit even or odd shelf installation - a proven feature for smooth-flow piping arrangements.

AIR SEALED FOR EFFICIENCY

Full pressure door locks, close tolerance and quality controlled construction throughout insure you of a completely sealed air system for efficient drying.

CONVENIENT FEATURES

Continental Eagle tower driers are equipped with proven and practical features-- features that will increase your drying quality and efficiency. Full-length ladders, an integral part of every section, give full height access to both sides of the tower. All shelves are easily accessible from hinged doors on opposite sides of each section for maintenance when not in use. Every door comes equipped with heat proof windows - convenient for your visual inspection of cotton flow.

THE CONTINENTAL EAGLE SYSTEM

Super-capacity gin plants demand ultra-sophisticated drying systems providing accuracy, efficiency and dependability. Continental Eagle's Type 35 & 610 Heaters, Vertical Flow driers, Versatile Tower Driers and High Volume Fans are the world recognized leaders in super-capacity, super-quality, and super-efficient drying. Temperature, Volume of air, and exposure time are three important elements of drying. Continental Eagle Drying Systems are engineered to meet a wide range of drying applications to improve your ginning capacity and quality.
