## MSRTC STAFF STRIKE

# Passengers bear brunt: Pvt operators' services insufficient, fares much higher

VALLABH OZARKAR  
MUMBAI, NOVEMBER 12

PASSENGERS WHO rely on Maharashtra State Road Transport Corporation (MSRTC) buses have continued to face hardship due to the indefinite strike of MSRTC employees since October 27 demanding merger of the corporation into the state government.

Though private buses, vans and other operators were allowed to ferry passengers from the depots, the number of private operators was insufficient to cater to the passengers.

Private vehicles started operating from Tuesday after the state government permitted them, and school buses, small midi buses, jeeps and other small four-wheelers plied from most of the depots.

Though it was suggested that services of private vehicles should be provided at ST ticket rates, there was no monitoring system to curb overcharging, and passengers had to pay higher fares.

Also, private travel operators could not provide last mile connectivity in many areas.

Private operators managed to provide services to commuters between Mumbai-Nashik, Mumbai-Aurangabad, Mumbai-Shirdi/Nashik, Mumbai-Pune, Mumbai-Kolhapur, Mumbai-Ratnagiri, Mumbai-Satara/Sangli routes, but charged almost double the usual fare.

Rahul Sansare, who was travelling from Nashik to Mumbai, had to pay Rs 800 for the journey, for which the ST would have charged Rs 350 for AC Shivshahi bus.

"I had gone to my hometown for Divali and my leave ended on Wednesday. Since the strike was on, there was no ST bus from Nashik to Mumbai. I had to pay Rs 800 for the private vehicle,"

Private buses wait for passengers at the Swargate bus station premises on Friday. Pavan Khengre

Sansare said. According to passengers, private operators are reaching the main central bus stations from metro cities. However, they do not reach interior parts and villages, as the ST buses would, even if they are paid extra fare. Those travelling to interior parts have to use jeeps, taxis and autos.

Ankush Galkwad, Ahmednagar said, "I reached the central point in the city but there was no ST bus to reach my village. Jeeps were not only charging extra but also carrying extra passengers."

The MSRTC is making efforts to restore bus services. On Friday it managed to run 36 buses and claimed that around 1500 employees returned to work.

Shekhar Channe, Vice-President and Managing Director of MSRTC, said that responding to

the appeal by Chief Minister Uddhav Thackeray and Transport Minister and President of ST Corporation Adv. Anil Parab, ST employees have started returning to work. He also said that the strike had caused loss of about Rs 125 crore to the ST Corporation.

"We want to start bus services so that passengers are not inconvenienced by the strike. The police are being assisted to ensure that employees who want to come to work are not hindered. Due to the presence of workers, 36 buses were dispatched today. About

800-900 passengers have travelled. Private vehicles are also being released from the depot," Channe said, adding that many employees are keen to resume work.

He appealed to staffers to end the strike and resume work.

## 'Winter chill' to disappear briefly, state to receive light rain and thunderstorm till Tuesday

EXPRESSNEWS SERVICE  
PUNE, NOVEMBER 12

AFTER AN early start to winter-like chill, Maharashtra will experience some wet days, accompanied by thunder and lightning till November 16, the India Meteorological Department (IMD) said in its latest forecast issued on Friday.

This will be under the influence of the likely formation of a low-pressure system in the Bay of Bengal and its west-northwestwards movement to mainland India.

The Met department has issued an 'Yellow' alert over most districts of southern Konkan, Madhya Maharashtra and Marathwada starting Saturday. This alert — ahead of likely thunderstorms — prevails over Ratnagiri, Satara, Sindhudurg,

Pune, Raigad, Ahmednagar and Thane will also experience thunderstorms till November 16, said IMD officials

Kolhapur, Solapur, Beed, Osmanabad, Latur and Nanded districts for Saturday. All these districts, in addition to Pune, Raigad, Ahmednagar and Thane, will also experience thunderstorms till November 16, said officials of IMD, Pune.

Over Pune city, minimum temperatures continue to remain marginally below normal. On Friday it was 11.9 degrees Celsius but this trend will change during the next two to three days. During

the days ahead, the nights will be humid as cloudy sky conditions will push temperatures upwards. A fresh low-pressure system will develop in east central Bay of Bengal on Saturday.

As it moves westwards towards Andhra Pradesh-Odisha coast, further movement will influence weather over Maharashtra,

said Anupam Kashyapi, head of the weather forecasting division, IMD Pune.

"This system will bring moisture from the Bay of Bengal over to parts of southern Maharashtra, as the system nears the east coast around November 15. As a result, there is a possibility of light rain and thunderstorm over Maharashtra," said Kashyapi.

Meanwhile, with a minimum temperature of 10.6 degrees Celsius, Jalgaon was the coldest city in Maharashtra on Friday.

## ADVERTORIAL

**Diabetes is a growing challenge in India with estimated 8.7% diabetic population in the age group of 20 and 70 years.**

**Dr. Sachin Gathe**  
Diabetologist  
NAGPUR

The rising prevalence of diabetes and other non-communicable diseases is driven by a combination of factors - rapid urbanization, sedentary lifestyles, unhealthy diets, tobacco use, and increasing life expectancy. Obesity and overweight are the most important risk factors responsible for diabetes. Much of the diabetes burden can be prevented or delayed by behavioural changes favouring a healthy diet and regular physical activity.

Diabetes is a possible cause of blindness, kidney failure, heart attacks, stroke and lower limb amputation. Simple lifestyle measures have

been shown to be effective in preventing or delaying the onset of type 2 diabetes. Most people with type 2 diabetes require oral drugs to lower blood glucose levels but some also require insulin or other injectable drugs. The prime treatment goal for patients with diabetes is to avert the onset and progression of diabetic complications. To prevent cardiovascular events, patients should maintain optimal long-term glycaemic control and avoid hypoglycaemia. High variability in blood glucose (BG) control in chronic glycaemic control is linked with a high risk of hypoglycaemia related hospitalization.

Consult your doctor to learn more about glycaemic variability (GV) and understand how you can control GV ups and downs.

Issued in public interest by Alkem Laboratories Ltd.
